The Eclipse	2013		Neighbours	Grundy Television Australia, 7 Network, Grundy Television Productions		Australia	English	22 min	Season 1, episode 6646. A variety of dramatic incidents take place in Erinsborough on the day of the solar eclipse. As the local community gathers together to witness the astronomical event, the Ramsay Street residents are unaware that some of their lives might be about to change forever. Elsewhere on Ramsay Street, Kyle Canning makes a costly mistake as he stares directly at the eclipse without wearing eye protection. Kyle (Christopher Milligan) does so after his mischievous pet dog Bossy runs off with his safety glasses.

Partial Eclipse of the Heart	2012	Adam Kane	Being Human	Muse Entertainment, Zodiak USA		Canada, USA	English	43 min	Season 2, episode 12, first aired on 2 April 2012. In the 2012 episode "Partial Eclipse of the Heart" from the TV series "Being Human," the writers employ a Total Eclipse of the Sun to super-charge the supernatural. When the eclipse takes place – the characters are caught off guard – and the dead return to the earthly plane to confront the assailants that "shredded" them. Following in the classic mythos of eclipses, as used in the 1986 film "Ladyhawke," the few brief moments of totality creates an ethereal pocket in space and time where dearly departed lovers are given a final chance to reconnect, face to face, before facing eternity apart. As far as treatments go, there is nothing much new here. But the nod to the classical treatment has a lot of credibility in my opinion,

Seven Twenty Three	2009	Daisy von Scheler Meyer	Mad Men	Lionsgate Television, Weiner Bros, AMC, Radical Media, UROK Productions		USA	English	60 min	One Saturday afternoon, protagonist Don Draper takes his daughter, Sally, to a solar eclipse observing party near their home in Upstate New York. Sally observes the eclipse, which we take to be less than total, through an over-the-head pinhole projection box. Sally's teacher uses the term "camera obscura." One of the other dads claims that he stares at the Sun every day. Don thinks this is a bit odd, but he doesn't seem to worry about the other dad's vision. The teacher offers to let Don look through the camera obscura, but he declines, saying that he'll wait until the eclipse has progressed a little more. The teacher points out that this only happens "every ten years," so you don't want to miss it. When Don does look, he is careful to put on his (ordinary) sunglasses. Elsewhere, Don's wife, Betty, is having a business lunch with a gentleman of her acquaintance. After lunch, as they leave the restaurant, they encounter a waitress and another man using a pinhole to project an image of the eclipse onto a screen. When Betty looks up to see the eclipse, the gentleman shields her eyes with his hand, warning her not to look at it. There
Moon Dancers	2009		Commercial				English	30 sec	In this commercial for Bridgestone tires, which was originally aired during the Superbowl, a couple astronauts are frolicking around a moon in a suped-up moon buggy listening to hip-hop music. They get out and start collecting rock samples all the while dancing to the heavy beat. When they come back to their vehicle, it's sitting on blocks and all four tires have been stolen. Einstein and Eddington	2008	Philip Martin	n/a	BBC Drama, HBO, Company Pictures		UK, USA	English	90 min	This film takes a closer look at the story behind the creation of Albert Einstein's general theory of relativity and the personal lives of the men behind it. Eddington's expedition to Africa to photograph light bending round the sun during an eclipse lead to his proof that Einstein's theory is right, turning Einstein into a worldwide superstar in 1919. (Press release) The TSE of 1919 does feature prominently in "Einstein and Eddington" but since that eclipse was such an important part of their lives with the measurements made by one man vindicating the theory of the other, the film makers could hardly have left it out! On the whole the treatment of the eclipse was pretty good, although it was clearly put together by the special effects department with no real footage being used. Eclipse facts and figures in the film: "Eddington" mentions that "if the cloud breaks at quarter past two tomorrow..." – indeed the Sun was totally eclipsed at 14:15UT on

BMW	2007		Commercial				Music only	40 sec	In a new commercial broadcast in Germany, a couple in separate BMW 1 series cars drive back and forth into daylight and night-time and both end up at a steep coastline to watch a total solar eclipse. The eclipse is a real one and it seems to be the one from Australia 2002. The man introducing the clip is former German Formula 1 driver Hans Joachim Stuck. (Joerg Shoppmeyer, SEML) It's certainly a real eclipse, but if the commercial's image is upright then the Moon is travelling in the wrong direction for Australia 2002. (Fraser Farrell, SEML) The idea behind this commercial seems to be that the two drivers are playing cat and mouse with the Moon's shadow, exiting it (daylight) and falling back into it (nighttime), over and over, until they

Then again, the producers of the show made it get dark almost immediately after the Moon started encroaching upon the Sun's disk. Apocalypto	2006	Mel Gibson	n/a	Icon Productions		USA	Maya w/ English s/t	139 min	This is Mel Gibson's brutal tale of human sacrifice set in the great Mayan civilization before its fall. After being kidnapped and dragged through the jungle, our hero, Jaguar Paw, is set to be sacrificed to the Sun god. But before his heart can be cut out a total eclipse of the sun takes place. This impresses the kingdom's chief and he proclaims an end to their sacrificial ways. The mechanics of the eclipse are badly misrepresented as is so often the case when eclipses are employed by filmmakers to influence their story lines. The Moon moves very quickly to cover the Sun, then stops for a while, then moves quickly off again. Even Mel can't change the velocity of the Moon. The computer generated image of the totally

Unlike many film eclipses, the Moon moves at a comparatively realistic rate. As the eclipse progresses, I believe there is an attempt to portray the shadows as getting sharper. At totality, however, the insects continue to use their pinhole viewers! During that time, the sky becomes dark, stars appear, and most importantly, night-time insects come out to play.

The cinematography is beautiful, the setting is stunning and the acting strong. Halfway through the movie, the main character Fernanda Torres witnesses the Brazillian 1919 Einstein eclipse & meets the scientific party. She tries to convince them to take herself, her mother and daughter out of the remote wilderness. The cinematic rendition of the eclipse whilst not perfect is vastly better than some others I've had the misfortune of seeing.

Symbols of his seduction by the dark side of the Force and the rise of shadow can be found throughout the film. One such symbol is a total solar eclipse – long invoked by artists and filmmakers as a portent of doom. The eclipse scene comes on the fiery planet of Mustafar soon after Anakin has become an apprentice of the evil chancellor and hope for the young Jedi seems lost. Poes Poes Poes	2000	Frank Van Passel	n/a	Victoria		Belgium		5 x	This is a story of a group of people going to watch the eclipse of 1999 in a Walloon village in the south of Belgium. The production consists of a five part film series, announced as 'a serial, theatre on big screen'. The scenario is after the work of the Flemish author Paul Mennes. The film will be directed by Frank Van Passel, known from Manneken Pis , Terug naar Oosterdonk and Villa des Roses. The film will only be shown in theaters in Belgium and Europe, at a rate of one episode per week. In the Kaaitheater they will all be shown in one marathon session between 24 and 28 June 2003. I don't know much what the story is about and whether some images of the real eclipse will be shown. It is rather low budget production.

Angela's Ashes	1999	Alan Parker	n/a	David Brown Productions, Dirty Hands Productions, Scott Rudin Productions, Universal Pictures International		USA, Ireland	English	145 min	The film shows the main character (Frankie McCourt) watching a lunar eclipse on the eve of his emigration from Ireland to the USA. When I read McCourt's follow-up book ('Tis: A Memoir) I found that McCourt set sail for America in October 1949, so the lunar eclipse depicted in the film is that of October 7th 1949. I remember that the eclipse in the movie was speeded up greatly (use of artistic license?), it was clearly done via special effects, with the real shots of the Moon prior to the 'eclipse' being followed by a special effects Moon for the eclipse itself. Unfortunately, the 'special effects Moon' was inverted and the Moon entered the Earth's shadow on the Mare Crisium side (the reverse of a real eclipse). Once the eclipse was over, McCourt is shown looking at the Moon in a once-again-empty

Nohoi oron (State of Dogs)	1998	Peter Brosens, Dorjkhandyn Turmunkh	n/a	Inti Films, Tobch Toli		Belgium, Mongolia, Finland	English / French	91 min	In Ulan Bator, Mongolia, the human population numbers 800,000 and the stray dog population is estimated at 120,000. Fearful of disease, city authorities have hired dog hunters. The film is seen through Baasar's eyes, an abandoned sheep dog who once roamed the steppes but now struggles to survive as a stray in the city. He meets his faith at the hands of a dog hunter but then his souls sets out on a journey to prepare himself to be reborn as a man on the day of the total solar eclipse of 1997. Artfully constructed, this poetic tale's cinematography is stunning. The eclipse myth of the dragon Rah consuming the sun, bringing chaos, destruction and death is cleverly woven throughout the film.

Dolores Claiborne	1994	Taylor Hackford	n/a	Castle Rock Entertainment, Colombia Pictures		USA	English	132 min	An adaptation of Stephen King's novel Gerald's Game. A big-city reporter travels to the small town where her mother has been arrested for the murder of an elderly woman for whom she worked as a maid. Stephen King uses the awesomeness of totality well in this thriller. However, the 1963 eclipse was not seven minutes as claimed in the film but around 100 seconds. The shot is a special effect, not a real eclipse. (Olivier Staiger) Totality began with three magnificent Baily's Beads, spanning an arc of about 40 degrees around the lunar disc. Baily's Beads spanning such a long arc are not possible during a seven minutes total solar eclipse. In such eclipse, the apparent lunar disc is much larger than the apparent solar disc and Baily's Beads can only appear relatively close to one another. For Baily's Beads to span such a large arc the apparent size of the Moon and Sun would have to be nearly equal and hence totality on the central line would last at most half a minute. (Wil Carton)
Eclipse	1994	Jeremy Podeswa	n/a	Fire Dog Films, Malo Film, TiMe Medienvertriebs GmbH		Canada, Germany	English	95 min	Set in Toronto during the two weeks preceding a total solar eclipse, the film tells the complex story of how the events affects ten diverse (and occasionally perverse) people, primarily through their sexual liaisons. The eclipse paradoxically casts light into the souls of the ten protagonists and also works as a powerful, primal mythic event. As it approaches, like moths flying into a celestial flame, the ten plunge themselves into a series of sexual trysts, gay, bi-sexual and straight. Meanwhile, the film chronicles the carnival-like atmosphere surrounding them in the city itself. The eclipse is both symbolic and real. In anticipation of shooting the film, Podeswa and a small team shot actual 35 mm footage of a total eclipse that passed over Baja

In a scene where Jim is seeking the shamanic spirit on a drug-induced trip to the desert outside Los Angeles, Stone employs the visual of a total eclipse in the sky to effectively mirror the climactic state of the heavens with the character's magical, spiritual quest. The eclipse images look real to be although the exposure shows nothing of the corona making it difficult to determine which eclipse it is. Anyone care to make a guess ? Coup de Torchon	1981	Bertrand Tavernier	n/a	Films A2, Les Films de la Tour, Little Bear		France	French / English	128 min	Lucien Cordier is the village cop in a French African colony in the 30's. He is a washout and everyone, including his wife Huguette, humiliates him. He never arrests anyone and generally turns a blind eye to what goes on around him. But one day, he turns into a machiavellian exterminating angel. (Adapted from Yepok, IMDb) As the film starts, Philip Noiret (playing a local colonial police officer) is looking at a total eclipse of the Sun together with a small African boy. As totality arrives the boy becomes frightened and feels chilly. Noiret gathers some firewood and builds a fire around which they gather to overcome their cold and their fear. From this description one can see that the scene isn't very realistic. First, the temperature drop as depicted is extreme. Second, by the time it would have taken to build and start the fire totality would have been finished. Third, wouldn't the characters been more interested in watching

The Incas, believing that Tintin can command the Sun, free their captors.

2001 : A Space Odyssey	1968	Stanley Kubrick	n/a	Metro-Goldwyn-Mayer, Polaris		USA, UK	English	139 min	Stanley Kubrik's classic screen adaptation of Arthur C. Clarke's equally classic science fiction novel. The film opens with a lunar eclipse as seen from a point just beyond the Moon. As the camera rises from behind the normally hidden face of the Moon (hidden from earthbound observers, of course), it reveals the Moon-Earth-Sun alignment. As the camera rises further into space, the Sun, in turn, is seen slowly rising from behind the Earth. Of course it could be argued that this sequence simply depicts a full Moon alignment and not necessarily a lunar eclipse. That argument has some merit since it does seem that the Sun appears from behind the Earth too soon after the camera clears the lunar limb, when one should still be in the Earth's umbra which is several Moon diameters large at that point in space . On the other hand, the nighttime face of our planet does not seem to be lit by

Dick is excitedly commenting to Bruce about "tomorrow's eclipse; that several countries are sending geophysical teams to Gotham City to observe the phenomenon. Fast forward to the end of the episode and we find our heroes on the roof of a building, binded to tin griddles positioned under two giant magnifying lenses (!); the Catwoman intends to incinerate Batman and Robin using the heat of the Sun! How can they possibly escape? That was the cliffhanger end to part 1. Of course, part 2, The Cat and the Fiddle, reveals the answer, which will involve the

Barabbas	1962	Richard Fleischer	n/a	Colombia Pictures, Dino de Laurentiis Cinematografica		USA	English	144 min	The story of Barabbas, the criminal who was set free by Pilate instead of Jesus Christ. The crucifixion scene was actually shot during totality on February 15, 1961, at Roccastrada, 120 miles northwest of Rome, using three cameras and... some artificial lighting ! I have found two sources of information about the eclipse sequence in Barabbas. The first article, Totality, Cinema and Crucifixion, appeared in Astronomy, Nov. 94. It quotes an interview with Dino de Laurentis, the film's producer, which appeared in the New York Times on Oct. 7th, 1962 and is entitled A Producer's Siege of Barabbas. Both articles are informative. A later issue of Astronomy, quite possibly that of Dec.94 contains a letter to the editor and makes a few corrections to the initial Astronomy article. The decision to stage and shoot the crucifixion scene during the eclipse was not part of the original plan, but once told about it Fletcher and his director of photography

Incident of the 100 Amulets	1960	Stuart Heisler	Rawhide	CBS		USA	English	60 min	Season 2, episode 27, original air date 6 May 1960 As the episode opens, the herd is restless. The drovers are nonplussed as the light begins to fail, until one announces, "Mr. Favor! The Sun's goin' out!" Gil Favor declares: "That 's an eclipse, when the Moon comes between the Sun and us." A drover expresses the alternate hypothesis that this might also be the endthe created world. The partially-eclipsed Sun is depicted in the sky as a circle with a bright crescent on the left, the rest of the circle being black. It looks to me as if the Sun was shot normally, and then the obscured part of the Sun was colored in artificially. However, it occurred to me that I have never seen nor photographed a partial

Fantasia	1940		n/a	Walt Disney Pictures		USA	English	124 min	A collection of animated interpretations of great works from the classical music repertoire. In the closing chapter of <i>The Rite of Spring</i> , the great dinosaurs die off following a catastrophic and lengthy drought. This is followed by a total solar eclipse. As the Moon moves over the Sun at a brisk pace, in what is a common movie mistake, the full lunar disk is clearly visible during the partial phase. Before second contact, an earthquake and then a great flood of biblical proportion transform the face of the parched landscape. During this time the eclipse continues unabated until the onset of totality. At that time, the corona appears with streamers and is depicted quite accurately, save for a slow pulsating effect. The episode ends with an artistic "wide" shot of Earth as seen from space as it, in turn, eclipses the
